

Manisha Reddy Janga

(Sr. UIUX Analyst)

+1 (908) 301-6962 | Jangamanishareddy9@gmail.com

PROFESSIONAL SUMMARY

- + UI/UX Analyst Developer with 10+ years of experience designing intuitive, accessible, and user-centered digital experiences for enterprise web applications across diverse business domains.
- + Strong expertise in user interface design, user experience research, wireframing, prototyping, usability analysis, and front-end development with a focus on delivering highly engaging and accessible solutions.
- + Experienced in conducting user interviews, stakeholder workshops, usability studies, and behavioral research to identify user needs, business goals, and experience improvement opportunities.
- + Proficient in creating user personas, journey maps, user flows, storyboards, wireframes, mockups, and interactive prototypes to support product design and application modernization initiatives.
- + Hands-on experience designing responsive web applications using HTML5, CSS3, JavaScript, Bootstrap, Angular, and modern front-end development practices.
- + Strong knowledge of WCAG accessibility standards, ADA compliance requirements, accessibility testing methodologies, and inclusive design principles for enterprise applications.
- + Experienced in collaborating with Business Analysts, Product Owners, Technical Leads, developers, QA teams, and business stakeholders throughout the software development lifecycle.
- + Proven ability to transform business requirements into visually appealing, highly usable, and technically feasible interface solutions that enhance user satisfaction and operational efficiency.
- + Skilled in conducting usability testing, accessibility audits, heuristic evaluations, and user validation sessions to improve application effectiveness and user adoption.
- + Experienced in developing and maintaining design systems, UI standards, style guides, component libraries, and reusable design assets to ensure consistency across digital platforms.
- + Strong understanding of information architecture, interaction design, visual design principles, responsive design methodologies, and user-centered design frameworks.
- + Proficient in Agile Scrum methodologies, participating in sprint planning, design reviews, backlog refinement, usability assessments, and iterative product development activities.
- + Experienced in creating comprehensive design documentation including wireframes, prototypes, user research findings, usability reports, accessibility assessments, and functional design specifications.
- + Excellent communication, analytical, problem-solving, facilitation, and stakeholder management skills with a proven ability to deliver high-quality user experiences aligned with business objectives.
- + Passionate advocate for end-user needs with extensive experience improving application usability, accessibility, visual consistency, and overall customer experience across enterprise digital solutions.
- + Developed reusable design components and front-end frameworks aligned with established design systems, accessibility standards, and enterprise UI guidelines.
- + Translated complex business requirements into intuitive user interfaces through close collaboration with stakeholders, product teams, and technical architects.
- + Performed user behavior analysis and usability assessments to identify friction points and implement design improvements that enhanced overall user satisfaction.
- + Designed and maintained scalable front-end architectures utilizing component-based development methodologies and reusable UI patterns.
- + Developed responsive layouts using modern CSS frameworks and mobile-first design principles to ensure consistent experiences across devices and browsers.
- + Created interactive prototypes and proof-of-concepts to validate user workflows, design concepts, and application functionality prior to development.
- + Implemented advanced JavaScript functionality to enhance application responsiveness, user interactions, and dynamic content rendering.
- + Conducted accessibility reviews and remediation activities to improve compliance with ADA requirements and WCAG accessibility standards.
- + Partnered with development teams to establish front-end coding standards, UI implementation guidelines, and accessibility best practices.

EDUCATION

- ✦ Bachelor of Technology, India.

CERTIFICATIONS

- ✦ Certified AWS Developer Associate

TECHNICAL SKILLS

Backend Technologies	Core Java, Java 8/11/17/21, J2EE, Spring Framework, Spring Boot 3.x, Spring Cloud, Spring Security, Microservices, RESTful APIs, Spring Data JPA, Hibernate 6.x, Redis, Caffeine Cache, OAuth2, JWT, RBAC, Testcontainers
Frontend Technologies	Angular 17+, RxJS, NgRx, Angular Material, ReactJS, Redux, JavaScript, TypeScript 5.x, HTML5, CSS3, SCSS, Bootstrap, Jest, Jasmine, Cypress
AI & LLM Technologies	OpenAI API, Azure OpenAI, AI API Integration, LLM API Integration, Conversational AI, Chatbot Development, Generative AI Workflows, Speech APIs, Vision APIs, TensorFlow, Machine Learning, Predictive Analytics, AI-Driven Simulations, Anomaly Detection, Unsupervised Learning
Messaging&Streaming Technologies	Apache Kafka, RabbitMQ, MQ, Event-Driven Architecture
Databases	Oracle, PostgreSQL,MySQL, MongoDB, Cassandra, SQL, NoSQL Databases, RDBMS, DB2
Cloud&Container Technologies	AWS, Google Cloud Platform (GCP), Azure, Azure Storage Services, Docker, Containerized Services, Cloud Computing, Kubernetes, Amazon ECS, Amazon EKS, EC2, S3, Lambda, API Gateway, GCP
Monitoring & Logging Technologies	ELK Stack, Elasticsearch, Logstash, Kibana, Audit Tracking, Application Logging, Prometheus, Grafana, ELK Stack, OpenTelemetry,
DevOps & CI/CD	AWS, EC2, S3, Lambda, API Gateway, RDS, CloudWatch, SNS/SQS, Docker, Kubernetes, Terraform, CloudFormation, AWS CodePipeline, GitLab CI
Blockchain Technologies	Blockchain, Smart Contracts, Distributed Ledger Technologies
Security&API Technologies	OAuth, OAuth2,, JWT, API Gateway, Authentication & Authorization, Secure REST APIs, Keycloak, Multi-Factor Authentication (MFA), Secure Financial Messaging, API Security
Financial & Trading Technologies	Electronic Trading Systems, Trade Order Matching, Risk Analysis, Settlement Processing, Financial Messaging Systems, Trading Platforms, Reconciliation Systems, Market Data Processing
Streaming & Media Technologies	WebSockets, Audio Processing APIs, Video Processing APIs, Streaming Workflows, Media File Integration
Testing & Monitoring	JUnit, Mockito, Debugging, PerformanceTuning, Application Monitoring
Methodologies	Agile Scrum, SDLC, DevOps, Jira, Confluence, Cross-functional Collaboration
Design & GUI Tools	Eclipse, IBM RAD/WSAD, NetBeans, Notepad++
App servers	IBM WebSphere, Apache Tomcat, BEA Web Logic, JBOSS
Design/Version Control	CVS, SVN, VSS, GIT
Operating Systems	Windows, Linux, UNIX
Defect Tracking	JIRA, Confluence, Bugzilla, Rational Clear Quest
Webservice Implementation	Axis 1.0,2.1, JWSDP2.1, Sun Metro, Sun Jersey, Apache Fire, Apache CXF
Infrastructure as Code	Terraform, Cloud Formation, ARM
Big Data	Scala, Databricks, Spark SQL, Spark Streaming, , PySpark

PROFESSIONAL EXPERIENCE

Client: Duke Energy

- + Conducted comprehensive user research activities including stakeholder interviews, contextual inquiries, surveys, and observational studies to uncover user behaviors, expectations, and usability challenges.
- + Developed intuitive user interface designs that improved user engagement, task completion rates, and overall customer satisfaction across web and enterprise applications.
- + Created detailed user personas, empathy maps, customer journey maps, and usage scenarios to guide product design decisions and user-centered development efforts.
- + Facilitated collaborative design workshops, brainstorming sessions, and requirement discovery meetings with business teams, product owners, and technical stakeholders.
- + Designed low-fidelity sketches, wireframes, interactive mockups, and clickable prototypes to visualize business requirements and application workflows.
- + Performed usability evaluations and user validation sessions to identify design opportunities and improve application effectiveness.
- + Applied WCAG accessibility guidelines and ADA compliance standards throughout the design lifecycle to ensure inclusive digital experiences.
- + Partnered closely with Business Analysts to translate functional requirements into user-centered interface solutions aligned with organizational goals.
- + Conducted accessibility audits using industry-standard testing tools to identify compliance gaps and recommend remediation strategies.
- + Created high-fidelity prototypes using Figma, Adobe XD, Sketch, and other design platforms to demonstrate application behavior and interaction patterns.
- + Collaborated with development teams to ensure design implementation accuracy and adherence to established user experience principles.
- + Established reusable design systems, UI component libraries, style guides, and visual standards to maintain consistency across digital products.
- + Evaluated existing user workflows and application interfaces to identify pain points and recommend experience improvements based on research findings.
- + Led visual design efforts involving typography, layout composition, color systems, navigation structures, and interaction design patterns.
- + Reviewed proposed interface solutions with technical teams to ensure implementation feasibility and alignment with system architecture constraints.
- + Designed responsive interfaces optimized for desktop, tablet, and mobile platforms while maintaining accessibility and usability standards.
- + Performed end-user testing activities and analyzed feedback to refine interface designs and improve overall user satisfaction.
- + Developed information architecture models, navigation hierarchies, content structures, and screen-flow diagrams supporting complex business applications.
- + Served as a user advocate throughout the software development lifecycle by promoting usability, accessibility, and user-centered design methodologies.
- + Conducted heuristic evaluations and cognitive walkthroughs to assess interface effectiveness and identify opportunities for optimization.

Client: MasterCard**Role: UIUX Analyst****Sep 2021 – Mar 2023**

- + Created detailed interaction specifications, design annotations, and UI documentation to support development and testing teams.
- + Collaborated with User Acceptance Testing teams to validate interface functionality, usability objectives, and accessibility requirements.
- + Implemented accessibility-focused design practices supporting keyboard navigation, screen readers, color contrast compliance, and assistive technologies.
- + Developed end-to-end user flows illustrating application interactions, decision points, and process improvements across business workflows.
- + Provided design recommendations based on usability metrics, user feedback, behavioral analysis, and industry best practices.

- + Participated in Agile Scrum ceremonies including sprint planning, backlog refinement, design reviews, and iterative solution delivery.
- + Created visual concepts and interface patterns aligned with organizational design frameworks and established application standards.
- + Performed competitive analysis and design benchmarking to identify emerging user experience trends and innovative interface approaches.
- + Worked directly with business stakeholders to understand operational needs and transform them into effective digital experiences.
- + Created accessibility remediation recommendations addressing ADA vulnerabilities and improving compliance across enterprise applications.
- + Developed wireframe libraries, prototype repositories, and reusable UX assets to streamline project delivery and design consistency.
- + Facilitated design review meetings with cross-functional teams to evaluate usability, visual design quality, and accessibility readiness.
- + Applied interaction design principles to improve navigation efficiency, reduce cognitive load, and enhance task completion success rates.
- + Designed enterprise application interfaces that balanced business objectives, technical constraints, accessibility requirements, and user expectations.
- + Performed qualitative and quantitative research analysis to support evidence-based design decisions and continuous user experience improvements.
- + Collaborated with developers during implementation phases to ensure visual accuracy, interaction consistency, and accessibility compliance.
- + Maintained comprehensive design documentation including user research findings, usability reports, wireframes, prototypes, and testing results.
- + Leveraged accessibility testing tools and manual validation techniques to verify compliance with WCAG standards and ADA regulations.
- + Created user-centered interface solutions supporting large-scale digital transformation initiatives, enterprise modernization projects, and customer experience enhancements.
- + Provided UI/UX leadership and guidance regarding accessibility best practices, usability principles, visual standards, and design governance processes.

Client: Procter & Gamble, Cincinnati, OH

Role: Frontend Developer

Jan 2019 – Aug 2021

- + Designed and developed responsive front-end applications using HTML5, CSS3, JavaScript, TypeScript, and modern UI frameworks to deliver intuitive and accessible user experiences.
- + Built interactive user interfaces based on wireframes, mockups, prototypes, and design specifications while maintaining consistency with enterprise design standards.
- + Implemented accessibility-compliant web interfaces following WCAG 2.1 and ADA guidelines, ensuring usability for users with diverse accessibility needs.
- + Created reusable UI components, design patterns, and front-end frameworks that improved consistency and accelerated feature development across applications.
- + Developed high-fidelity user interfaces from Figma, Sketch, and Adobe XD prototypes while preserving design integrity and responsiveness.
- + Performed front-end usability improvements based on user feedback, testing results, behavioral analysis, and stakeholder recommendations.
- + Worked closely with User Acceptance Testing teams to validate interface functionality, accessibility compliance, and user experience expectations.
- + Translated complex business workflows into intuitive screen layouts, navigation structures, and user-friendly interaction models.
- + Implemented responsive layouts using Bootstrap, Flexbox, CSS Grid, and media queries to support seamless experiences across devices and browsers.
- + Participated in user research sessions, stakeholder workshops, and design reviews to identify usability challenges and improve interface effectiveness.
- + Created interactive dashboards, data visualization components, and business-focused front-end applications supporting operational decision-making.

- + Collaborated with development and UX teams to ensure visual consistency, technical feasibility, and alignment with user-centered design principles.
- + Optimized front-end performance through lazy loading, code splitting, asset optimization, caching techniques, and efficient rendering strategies.
- + Developed accessibility-focused user interfaces with keyboard navigation support, ARIA attributes, screen reader compatibility, and proper semantic markup.
- + Implemented front-end validation frameworks and user-friendly error handling mechanisms to improve application usability and data accuracy.
- + Built dynamic web interfaces using Angular, React, or JavaScript frameworks while integrating REST APIs and backend services.

Client: Synchrony, Bengaluru, India

Role: Java Developer

Oct 2014 – April 2018

- + Developed custom low-latency data ingestion pipelines using Apache Kafka and Flink for processing high-frequency trading data.
- + Designed and implemented microservices architecture for trading applications using Spring Boot and Kubernetes.
- + Built distributed caching solutions with Hazelcast and Redis to improve trade order execution speeds.
- + Created robust transaction logging systems using ELK (Elasticsearch, Logstash, Kibana) for compliance and audit tracking.
- + Implemented rate-limiting strategies in API gateways to prevent excessive requests in financial applications.
- + Designed a robust reconciliation system for matching executed trades with settlement reports in PostgreSQL.
- + Integrated FIX and SWIFT protocols for secure and standardized financial messaging between institutions.
- + Developed real-time trade risk analysis tools using Spark and machine learning models to identify anomalies.
- + Engineered serverless event-driven architectures with AWS Lambda and SQS for trade execution notifications.
- + Built multi-factor authentication (MFA) solutions using Keycloak and OAuth2 for secure financial system access.
- + Designed reactive programming models with WebFlux to handle concurrent trade data streaming efficiently.
- + Implemented blockchain-based smart contracts for secure and transparent settlement of financial transactions.
- + Optimized query execution plans in PostgreSQL and MySQL for handling large-scale historical trading data.
- + Developed automated testing suites using Selenium, JUnit, and Cypress to ensure robust trading application reliability.
- + Created AI-driven trade strategy simulations using TensorFlow to predict market movements and optimize execution.
- + Engineered custom financial dashboards using React, TypeScript, and D3.js for real-time data visualization.
- + Designed a financial anomaly detection system using unsupervised learning techniques to flag suspicious transactions.
- + Developed distributed trade order matching engines with gRPC and Protobuf for high-performance processing.
- + Integrated event sourcing patterns with Apache Kafka to enable replayable financial transaction history.
- + Implemented dynamic pricing models using AI-powered predictive analytics to enhance profit margins in trading.
